

The Engineering Income & Salary Survey, 2006 Custom Report

Select your data cuts to preview the sample size. When you are satisfied with your data selections and sample size, click "Run Report". Once the salary data appears, you may print your report.

Note - To create a new report, select a new set of data cuts at the left. The salary data on your screen will disappear when you select a new data cut. You will not be able to retrieve the survey data again without using a new report run.
